LOTD 2 two

visual audio and lighting

The return of professional visual installation by Brian Dressel and OVT. Brian will construct visuals comparable to the display at the last event Brian did for us, "Universal Vibe 1997." Don't know what DJ is playing, when your favorite is coming on, or just want to gaze at visuals? OVT will have screens behind the DJ giving all the information you need. Diversified & Log 2 Audio, two of the most trusted sound companies in the Midwest, collaborate to provide all the loudness your ears can't handle. Intelligent lighting collaboration with Dan of Log 2, Jorge Zapata and Argon laser man, himself, Leprechaun Joe.

venue

2 two

A clean, 3-Room large capacity venue within a safe area of Chicago. We worked diligently to obtain the venue, so please take advantage but respect this fresh, comfortable space. The party is chartered to run from 8pm to 5am, with an afterhours to follow. Everyone outside of Illinois, bring your out-of-state ID and we'll make sure you get into the party. Security will be respectful, yet firm, no one will get kicked out unless they pose a threat to a positive atmosphere. R.O.A.R.
